

Indus India Index is an index of fifty large-cap companies listed on the Bombay Stock Exchange and/or the National Stock Exchange. The index is unique among India indices in that it explicitly takes into account the Foreign Holding Limits imposed by Indian regulators on the percent of each listed company foreign investors are permitted to own. The underlying Index Rules are such that Indus India Index includes only stocks which are currently available to foreign investors; and thus remains at all times fully replicable by funds.

The Index is re-constituted at the end of each January, April, July and October. The Index Provider has engaged Standard & Poor's to act as the Index Calculating Agent, to compute and publish the daily index value.
